Jawed Habib

CHAIRMAN AND MANAGING DIRECTOR

Moving forward. together

A message from Jawed Habib

Every phase of growth teaches us something new about our customers, our teams, our partners & ourselves. What has remained constant through the years is our belief in skill, discipline & the power of learning. A strong brand is not built only by opening more salons it is built by strengthening the people & relationships that carry the brand forward every day. This quarter has been about conversations, learning & connection. From interacting with professionals & students to meeting franchise partners. to taking simple hair wisdom to wider audiences, every moment reminds us that Jawed Habib is larger than any one salon. As we move ahead, our focus remains simple listen better, learn continuously, support our partners & never compromise on the standards people associate with our name. The journey ahead will keep changing. but we will continue moving forward together. *"Growth is meaningful when everyone connected to the brand grows with it."*

Come for the hair tips. Stay for more.

Jawed Habib on ABP Live's Journey with Romana

Put Jawed Habib in front of a camera & you rarely get a predictable conversation.
You get stories strong opinions simple hair wisdom unexpected humour & at least a few moments that make everyone in the room smile.
His appearance on ABP Live's Journey with Romana was no different. In his unmistakably candid style, Jawed Sir spoke about everything people worry about when it comes to their hair. hair fall, dandruff, oiling, shampooing, hair growth & the endless home remedies we all grow up hearing about. What made the conversation memorable was the ease with which he broke it all down. No intimidating jargon no complicated routines just decades of experience shared in the most straightforward & relatable way. Calling himself a "farmer of hair", he spoke about the scalp as the real foundation of healthy hair & explained why consistency often matters more than complicated routines. Premiered on 14 July 2026, the conversation crossed 1,40,000 views taking his no nonsense hair wisdom to an even wider audience.

"You may begin by listening for a hair tip. but you almost always stay for the personality."

Romance your hair.
The Jawed Habib

Jawed Habib on Pinkvilla's Daadi Approved

Some conversations give you answers some give you stories. & some, with Jawed Habib, give you both along with a few laughs you did not see coming. In his conversation with Clari John on Pinkvilla's Daadi Approved, Jawed Sir was candid, playful & completely himself. One moment he was breaking down the science behind a haircut the next, questioning everything we have been told about overnight oiling, onion juice & expensive hair products. Nothing felt rehearsed. nothing felt complicated. The conversation moved effortlessly from hair fall, baldness & grey hair. to the 99 haircut revolution, business lessons, family stories & his own philosophy. "Romance Your Hair." There were practical tips, sharp observations & several myths gently turned on their head. But beyond the advice, what stood out was the personality behind it all warm, witty, grounded & never afraid to say exactly what he thinks.

With over 135,000 views, the episode struck a chord with audiences looking for honest answers, useful advice & a conversation that was as entertaining as it was insightful.

"When Jawed Habib speaks hair care stops feeling like a complicated routine & starts feeling like a story worth listening to."

Back to where it all begins. The craft

Jawed Habib leads an exclusive hair seminar in Guwahati

For Jawed Habib, hair has never been only about the final look it has always been about understanding the craft behind it. At a recent exclusive hair seminar in Guwahati which was held on 6th August 2026, Jawed Sir stepped into one of the spaces he enjoys most. surrounded by hairstylists, salon owners, beauty professionals & young learners eager to understand the industry a little better. Organised by KeraActive+ Professional at Srimanta Sankardev Kalakshetra, Panjabari, the session brought together professionals & students from Assam & the wider North East. And true to the Jawed Habib style. it was far from a conventional classroom session. There were live demonstrations, practical techniques, conversations around current hair trends & simple lessons drawn from decades of experience behind the chair. The larger message went beyond a haircut. as customer expectations evolve, a hairstylist can never stop learning. Skills need to be sharpened, knowledge needs to keep growing & professionals need to continuously adapt. *"Trends may change. techniques may evolve but great hairdressing will always begin with great education."*

A visionary behind India's hair & beauty

Jawed Habib featured in CEO India Weekly's Visionary '25

Some recognitions celebrate success. others acknowledge the journey, the influence & the impact built over decades. Jawed Habib was recently featured by CEO India Weekly as part of its Visionary 25: India's Most Influential Business Leaders 2026. recognising his contribution to building one of India's most trusted names in hair & beauty. From taking professional hairstyling to a wider Indian audience to building a network of 1000+ salons across India. Jawed Sir's journey has always been rooted in one belief skill can change lives. Over the years, that vision has gone far beyond salons. Through education, workshops, seminars & professional training, thousands of aspiring hairstylists & beauty professionals have been introduced to the craft. What makes the recognition particularly meaningful is that it celebrates not only the entrepreneur behind the brand. but also the educator, the industry voice & the man who has spent decades encouraging people to take hairdressing seriously as a profession. *"It has never been only about building a business. it has been about building an industry around skill, education & opportunity."*

Don’t treat your hair like pickle. Yes, He actually said that

Aaj Tak features Jawed Habib’s simple take on oiling & scalp care

Leave it to Jawed Habib to take one of India’s oldest hair rituals & explain it in the most unexpected way. In a recent Aaj Tak feature, Jawed Sir addressed something almost all of us have grown up believing that the longer you leave oil in your hair, the better it must be for hair growth. His response? Simple your hair is not pickle. It does not need to sit soaked in oil for hours. The larger point is one he comes back to often hair care does not need to be complicated. More oil does not automatically mean more growth. expensive products do not automatically mean better hair & traditional advice is not always right simply because we have heard it for years. Sometimes, good hair care comes down to getting the basics right. a clean scalp, regular washing, sensible product use & consistency. And perhaps that is why Jawed Habib’s advice travels so well. he takes something we have believed forever turns it on its head. & somehow makes us smile while doing it. *“Oil for a few minutes not for hours. Keep the scalp clean & keep the routine simple.”*

More than a meeting. building stronger partnerships

West Bengal Franchise Meet 2026 with NanoCore Technology

A strong franchise network is built on more than business numbers it is built on trust, communication & a sense of belonging. The West Bengal Franchise Meet October 2026, held in association with NanoCore Technology, brought together franchise partners for a day of learning, interaction & connection. The session was designed to go beyond routine business updates. From product presentations & live demonstrations to conversations around services, revenue opportunities & developments from the Jawed Habib Head Office the meet created an open space for franchise partners to engage, ask questions & exchange ideas. One of the highlights was the interaction with Jawed Habib giving partners an opportunity to connect directly, share perspectives & spend time with the person behind the brand. The event also included partner recognition, group interactions & networking making the experience as much about relationships as it was about business. For a network spread across markets, these moments matter. They strengthen communication. reinforce trust. & remind every partner that while each salon operates in its own local market, it remains part of one larger Jawed Habib family.

"Stronger conversations. stronger partnerships. a stronger network."

Associated since 2020 | 7 salons | Family led business.

From one salon to seven. Built on discipline, trust & ambition

When Mrs. Ch. Bhagyavathi & Mr. Ch. Mallesh opened their first Jawed Habib salon in 2020, they were not simply starting another business they were building something they hoped would last. The husband & wife entrepreneurial team brought with them a strong business background, a shared interest in the beauty industry & a clear ambition to create a salon business that customers could trust. Six years later, that first step has grown into seven Jawed Habib salons. Their expansion has been driven by something far less glamorous than rapid growth headlines discipline. Across all seven salons, the CMB Group places strong emphasis on Jawed Habib brand standards, SOPs, service consistency & operational control. Their professionalism also shows up in the details from maintaining timely commercial commitments to creating systems that help every salon deliver a similar customer experience. To strengthen technical excellence across the network, they have appointed a dedicated Lead Technical Head who oversees training, quality standards & day to day technical management across all seven locations. Their relationship with the brand has also been personal. Jawed Sir has inaugurated three of their salons moments they describe with immense pride. And the journey is not meant to stop with them Mrs. Bhagyavathi & Mr. Mallesh hope to bring their children into the business in the years ahead. turning what began as an entrepreneurial decision into a family legacy.

"We are extremely happy to be associated with the Jawed Habib brand. we remain committed to working hard, maintaining the highest standards & expanding our salon network even further in the years to come."

Some people complete a brief. Fatema brings it to life

Fatema Khan | Design Manager | Head Office, Mumbai

In just one year with Jawed Habib, Fatema Khan has made a visible impact across the brand's design & communication initiatives. As Design Manager at the Head Office in Mumbai, she has worked on several important projects bringing creativity, clarity & consistency to every assignment she takes on. Her strength lies in the way she balances ideas with execution. She understands the brief works within timelines pays attention to every detail & still manages to add that extra edge that makes the final output stand out. From everyday communication requirements to key branding projects, Fatema approaches every task with the same focus, professionalism & commitment to quality. Her contribution has helped strengthen the visual identity of the organisation ensuring that every communication looks polished, relevant & aligned with the brand.

But it is not only her creativity that makes her stand out. Fatema is soft spoken, dependable & extremely easy to work with. She brings a calm energy to the team, collaborates effortlessly & continues to deliver even when timelines are tight. For her creativity, sincerity & consistent contribution to the brand, Fatema Khan is recognised as the Employee of the Quarter. *"She does not just design. she gives every idea a stronger identity."*

SEASONAL FOCUS

Humid weather Hair Guide

Healthy hair through humidity, rain & frizz

The monsoon may bring relief from the heat. but it also brings humidity, sweat, scalp build up, frizz & increased hair concerns.

A few simple habits can make all the difference.

1

KEEP THE SCALP CLEAN

Humidity & sweat can make the scalp oily faster. Wash regularly using a shampoo suited to your scalp type.

2

NEVER TIE WET HAIR

Wet hair is more fragile. Tying it tightly can lead to breakage, tangling & scalp discomfort.

3

DRY YOUR HAIR AFTER THE RAIN

Rainwater can carry dust & pollutants. Rinse when required & allow the hair to dry completely.

4

DO NOT OVER OIL

Excessive oiling on an already oily scalp can increase build up. Use oil appropriately & wash it out properly.

5

CONTROL THE FRIZZ

Use a suitable conditioner or serum on the lengths of the hair. especially when humidity is high.

6

COMB GENTLY

Use a wide tooth comb & avoid pulling through knots aggressively when the hair is wet.

7

LIMIT EXCESSIVE HEAT

Give the hair a break from frequent straightening, curling & high heat blow drying.

8

DO NOT IGNORE THE SCALP

Persistent dandruff, itching, irritation or unusual hair fall should be assessed by a professional rather than treated only through home remedies.

> ***Healthy hair begins with a healthy scalp & consistency always wins.***
